

Landscape Materials

The Classic black woven needle-punched fabric

Our Restrictor Fabric

Exceeds competitor's water flow rate.

Our 'Restrictor' landscape is favorite of classic landscape people. The black woven needle-punched fabric offers excellent strength and toughness and a very high degree of UV resistance. The consistency of the needle-punched openings successfully restricts weed growth and freely allows water penetration and air exchange with the soil.

Ideal Applications:

Landscape weed and erosion control.
 Patio and Stone/Paver/Sidewalk underlayment.
 Install under wood decks.
 Under blind drains.
 Between soil and aggregate.

Product Advantage:

Exceptional toughness and tensile strength.
 Highly UV resistant.
 Easily conforms to landscape contour.
 Very effective weed and erosion control.
 Consistent water and air permeability.

*Available as commercial size rolls and retail pallet displays.
 Both share the same physical properties*

Physical Properties

ASTM 5261	Basic Weight	4.8 oz/sq/yd
	Material	Woven Needle-Punched Polypropylene
ASTM 4632	Grab Tensile	110/100
ASTM 4632	Grab Elongation	31/59%
ASTM 4533	Trapezoidal Tear	57/55 lbs
ASTM 3786	Burst Strength	280 psi
ASTM 4833	Puncture	65 lbs
ASTM 4991	Water Flow Rate	12 gal/mm/ft ²
ASTM 4355	UV Resistance	70%/2500 hrs

RESTRICTOR PRODUCTS ARE BOUGHT FROM THRACE LINQ (LUMITE)

Commercial role sizes available:

Width	L/Ft/Roll
3'	250'
4'	250'
6'	250'
8'	250'
12'	250'

3', 4', 6' & 8' Rolls are 10 per pack.
 12' Rolls are 5 per pack.

Retail pallets available:

3' x 50' rolls

12 rolls per display · 6 displays per pallet · 72 rolls

3' x 100' and 4' x 100' rolls

6 rolls per display · 6 displays per pallet · 36 rolls

Fabric Swatch attached.
