

Landscape Materials

The difference is Superior fabric distribution.

Spunbonded Fabric

The most effective weed & erosion control.

Our fabric features polyester fibers spunbound into a swirling web-like pattern. The result is superior fiber distribution creating a unique weed prevention fabric. The process accounts the exceptional strength-to-weight ratio. The fabric's natural qualities offer exceptional ultra violet stability and unequaled water and air permeability. A must fabric for serious landscapers.

Product Advantage:

Retards weed growth with a barrier between mulch and soil. It allows water, air, herbicides, fertilizer and insecticide to flow into the soil. It also lends insulation to root systems against sudden temperature changes and minimizes erosion and loss of mulch due to soil intrusion. Chemically inert; resists mildew, rotting and insect invasion. Reduces plant bed maintenance and cuts back the need for watering. Maintains moisture better.

Physical Properties

Basic Weight	3 oz/sq/yd
Grab Tensile MD/CD	88/68 lbs
Grab Elongation MD/CD	78/70 lbs
Trapezoidal Tear	54/49 lbs
Water Flow Rate	256 gal/min/sq/ft
Permeability	.179 sec-1
AOS	.211
Puncture	30 lbs
Burst Strength	130 psi

Commercial role sizes available:

Width	Length	Sq/Ft	Roll Weight lbs
3'	300'	900	20
4'	300'	1200	27
5'	300'	1500	34
6'	300'	1800	40
7'	300'	2100	47
9'	300'	2700	60
12'	300'	3600	80
15'	300'	4500	100
